- ▶ 04 STYLED JAWS
- ▶ 07 TINIUS OLSEN STYLE JAWS
- ▶ 18 BALDWIN/SATEC STYLE JAWS
- ▶ 24 FORNEY STYLE JAWS
- ▶ 26 UNITED CALIBRATION STYLE JAWS
- ▶ 27 TESTING MACHINES

As a leader in the aftermarket supply of testing components, Sjogren industries has implemented a Smart Part Numbering System which allows our customers to build and customize their particular requirements. With this system you can now control how you identify your component inventory system by combining part numbers and descriptions simplifying your order processing.

In the below chart, Sjogren identifies the critical requirements for building the Smart Part Number. As stated with all Testing Machines, this information is listed on the machine or in the owners manual. There are five predominant machine builders that produce machines with Load Capacity ranges of 5,000-600,000 lbs. Utilizing a 1" or 2" requirement for all their Inserts and Holders. Varying Maximum Wire Diameters, Jaw Sizes, Styles and Gear Racks are designed to fit particular machines. Teeth Per Inch and Patterns can be personalized to your requirements.

The Smart Part Numbering System follow a simply yet logical pattern. For example, if you have a Tinius Olsen machine with 120,000 Capacity, Vee Jaw and Full Rack for .250-.500" Wire Diameter then your Smart Part Number could be:

** In this example the TPI (Teeth Per Inch) and Tooth Pattern can be customer preference.

A second example of the Smart Part Numbering System would be for a **Testing Machine** with 1" Flat Jaws, no Gear Rack for Maximum Wire Diameter of .500" with 10 Teeth per Inch and Diamond Pattern.

** In this example the TPI (Teeth Per Inch) and Tooth Pattern can be customer preference.

OPTIONAL FEATURES AVAILABLE

► WRAP TESTER

Need to test your spring wire for ductility? How about that metallic coating? Want to see if it's going to stick? This is just the machine you need. This benchtop unit can coil your wire like a spring so you can check for cracks and fractures. Size range from .050" to .375". It has a constant speed, adjustable chuck, wire guide assembly mounted to a sliding carriage, interlocked guards and an electrical control panel. It is also supplied with a wire bender.

► TORSION TWIST TESTER

This machine is ideal for testing your wire for brittleness, inclusions, hidden seams or other flaws. There are two different models for diameters of .010" up to .375". It features a fully programmable counter with automatic forward and/or reverse capability. It has 12 possible twisting programs with memory of the complete cycle. It includes a digital display, positive holding chucks with replaceable jaws, and an interlocked guard. The constant tension is provided by use of weights (5, 10, & 20 lbs) or by an optional pneumatic cylinder. An automatic broken wire switch will stop all machine function and all pertinent data will be maintained. Includes an AC variable speed drive. Max. speed depends on model.

At Sjogren Industries, we pride ourselves on being a trusted partner for businesses worldwide. Here's why working with us is the right choice for your operation:

Expertise You Can Rely On

With decades of experience, we specialize in material handling and straightening equipment. Our deep industry knowledge ensures we deliver solutions tailored to your unique challenges.

Uncompromising Quality

Our products are built to last. We are committed to delivering durable, reliable, and innovative equipment that minimizes downtime and maximizes efficiency.

Custom Solutions for Your Needs

Every operation is different, and we understand that. That's why we work closely with you to develop customized solutions that align perfectly with your goals.

A Reputation You Can Trust

Our long-standing reputation for reliability and excellence is a testament to the trust businesses place in us. When you partner with Sjogren, you're choosing a company with proven results.

Superior Technical Support

We stand by our products with exceptional service and support. From installation to maintenance and troubleshooting, our team is here to ensure your operation runs smoothly.

Global Reach with Local Care

Serving clients around the world, we deliver consistent quality on a global scale while maintaining the personalized service you deserve.

Driven by Innovation

We are constantly enhancing our technologies to stay ahead of industry demands. When you work with us, you gain a forward-thinking partner committed to your success.

Shortest Lead Time

Not only will your products be on-time, but because of our capabilities and automations, you can expect the shortest lead times in the industry.

Warranty Guarantee

We stand behind the quality of our products with comprehensive warranties available by request, giving you peace of mind and assurance in your investment.

At Sjogren Industries, we don't just provide equipment—we provide solutions. Let us help you achieve your operational goals with our trusted expertise and superior service.

As a global supplier of wire straightening tools and quality assurance testing tools and equipment that is focused on delivering durable, customized solutions on time and with the shortest lead time in the industry... we need the right people, and the right mindset to bring our best to the table. Learn more about the core values of the Sjogren Industries team, and what it brings to your table.

▶ EMPOWERMENT

"We provide for an environment where individuals are given autonomy, authority and resources to make decisions and take ownership of their work." This involves trusting and supporting employees to develop their skills, contribute meaningfully, and take initiative in achieving or succeeding organizational goals."

▶ TEAM

"Together, Everyone Achieves More! Suppliers and customers included. We maintain an environment and live a culture that consistently delivers more than the sum of the individual entities' potential."

▶ EMPLOYEE FIRST

"We respect the well-being, growth, and satisfaction of employees within the organization. We foster and develop a friendly, supportive, and inclusive work environment based on fairness, recognition, accountability, and trust."

▶ CUSTOMER IN THE ROOM

"We embody prioritizing the needs, satisfaction, and overall experience of customers by ensuring we understand their requirements and by delivering high-quality products and services on time."

▶ HONESTY

"Honesty is our foundation for trust, integrity, credibility, and dependability."

◀ QUALITY

"We are committed to excellence and the continuous pursuit of superior standards in products, services and processes."

◀ COMMUNICATE

"We value open and transparent communication as the foundation for collaboration, understanding, and success."

◀ EMBRACE CHANGE

"We are committed to adaptivity, flexibility, and openness to new ideas, technologies and methods."

◀ ACCOUNTABLE

"We take responsibility for our actions, decisions, and outcomes. We hold each other accountable to ensure we are able to consistently deliver results, with integrity and excellence."
